

## **ITS United Kingdom Student and Apprentice** **Essay Awards 2021** ***ENTER NOW!***

Entries are now open for the 2021 ITS (UK) awards for *students and apprentices*. The awards over the years have been in place to encourage interest and participation in the development of ITS technologies.

### **"The Innovative Application of ITS Solutions to Achieve De-Carbonisation Goals"**

This year's essay will focus on one of the most crucial and relevant themes within the industry in the present day – decarbonisation. We encourage participants to elaborate on various ITS solutions and innovations which will lead to accomplishing decarbonisation objectives and specifically on solutions that don't currently exist.

- *What are the key challenges and barriers facing de-carbonisation?*
- *How and why will ITS play an integral part in realising de-carbonisation goals?*
- *How do you envisage the transport industry of the future if the potential solutions are successful?*

As in previous years, we continue with the essay format. The awards will be for the best essay of 1500 words and is open to UK residents who were apprentices, undergraduates or MSc students at any time during 2021. Work may be based on existing course work, or written especially for the Award. Marks will be awarded for technical understanding, innovative ideas and a holistic approach to transport technology.

**Awards will be made in two categories:**

**Best essay by an Apprentice**

**Best essay by an Undergraduate or MSc student**

*Entries should be in Word format and submitted by 18<sup>th</sup> October 2021, and be endorsed by a tutor, manager or other competent person*

Entries and any questions to:- [rsoysa@its-uk.org.uk](mailto:rsoysa@its-uk.org.uk)

Please send all submissions to [mailbox@its-uk.org.uk](mailto:mailbox@its-uk.org.uk)

The two winning entries will be published by ITS (UK)
